
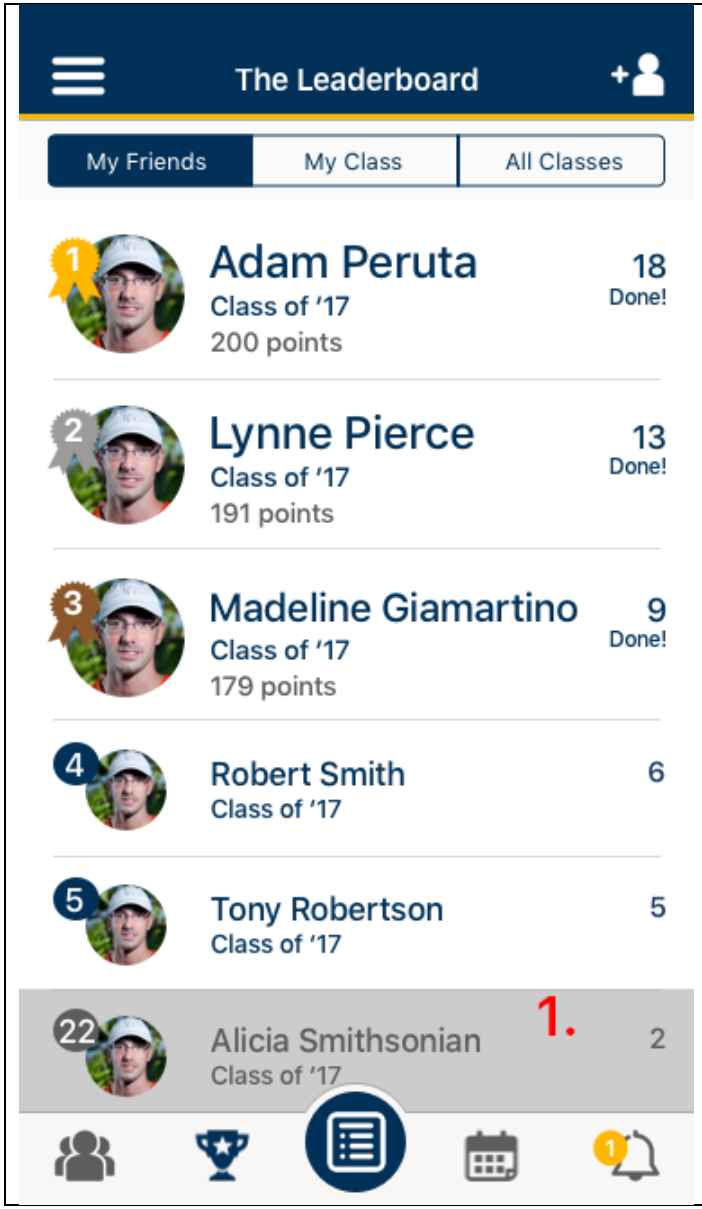
LEADERBOARD – TOP 10

1. Leaderboard currently shows the top 10 – if the current user is in the top 10, highlight the background of the row.
    a. Can you extend the color all the way to the sides of the screen? I like to respect the default margin for all items, but I think this would work well by going from side to side. If not, I will have to adjust the padding on the table cells a bit.
    b. Background color is: ffedbf

~~2. Add "Add Friend" icon (see screen changes coming up).~~

~~3. Add tab for "My Friends" to show leaderboard of this user's friends (see the upcoming pages).~~



LEADERBOARD – NOT TOP 10

1. If the current user is not in the top 10, show their position last (under the top 10), but highlight the background color as gray and gray out everything else.
    a. Background color is : EBEBEB (I lightened it up a bit since making this screenshot)
    b. Text color is: 5D5D5D
    c. Circle color with the position color is: 5D5D5D
